

Inventory, Asset and Resource Management

Inventory Control and Asset Management

iCAM is a easy to use, webbased, multi-user inventory tracking software solution designed to track inventory cache, supplies, consumables and equipment.

MULTI - FACILITY

Use iCAM to segregate inventory into multiple facilities and maintain a global view of all your inventory

GRANTACCOUNTABILITY

Associate inventory and assets to current or future grants.

PPE MANAGEMENT

Check-out assets to partner agencies and maintain historical logs.

PERISHABLE INVENTORY

Track and monitor inventory by expiration dates and view expiring inventory by location.

<u>SPECIAL</u> CLASSIFICATIONS

Utilize support controls and policies to manage access to hazardous materials or controlled substances.

SPECIFICALLY DESIGNED FOR:

- PUBLIC HEALTH
- EMS
- FIRE
- HOSPITALS
- VA HOSPITALS
- HAZMAT TEAMS
- DMAT
- DMORT
- USAR TEAMS
- CORONER
- LAW ENFORCEMENT
- MEDICAL RESERVE CORP
- STATE MEDICAL RESPONSE TEAMS

Get control of your supplies, equipment and inventory with iCAM, a complete inventory and asset management application specifically designed for emergency preparedness organizations. iCAM can be used to manage pre-identified medical surge, pandemic influenza, and bioterrorism-related public health and emergency medical services material, equipment and assets. iCAM's primary purpose is to inform personnel about the real-time availability of needed supplies and to track the delivery of needed materials in an emergency. iCAM is a web based scalable application that enables you to track your inventory according to your needs. Begin with a single facility license and expand as you grow or as your needs change. Easily track items at multiple sites and locations within each facility. Items can be tracked by grants as they are added into the system which allows you to report in real-time the remaining balance of materials per grant. iCAM allows you to log basic maintenance records on assets such as fire extinguishers and will monitor future maintenance dates. The system also manages non-consumable assets which may be checked in/checked out for use during specific events (e.g., satellite phones, radios, laptops, generators). Sydion's iCAM enables agencies of any size to systematically track inventory and assets with optimal transparency and accuracy.

Features and Benefits

SCHEDULE MAINTENANCE

Capture basic maintenance records on assets and monitor future maintenance dates.

REPORTING

Robust reporting engine with an extensive list of standard categorical and transactional reports. Export all reports to standard formats such as PDF, XLS, CSV, RTF, IMAGE and TEXT

LABELING & SCANNING

Pint barcode labels from iCAM and scan with Bluetooth or wireless 1D/2D scanners to expidite adding , issuing, checking-out inventory.

CONTACT US
