iCAM

INVENTORY CONTROL & ASSET MANAGEMENT

Web-based · Multi-facility · Multi-agency

Know what you have. Know where it is. Get it where it's needed.

Ready every day. Prepared when it matters.

Web-based inventory, asset and resource management for the agencies that respond. Track supplies, equipment and grant-funded purchases every day, across every facility. When an emergency hits, the same system shows what you have, where it is and how long it will last.

HOW ICAM WORKS

Receive
One item or a full shipment at once

Store & Track
Every facility, location and shelf

Request
Users request the supplies they need

Fulfill
Approve, pick and ship, in stages if needed

Deploy / Return
Out to the field, back to the shelf

Report
Live balances and full history

Location	Item	Qty	Qty Checked Out	Qty In House	Qty Deployed	Total Units	Lot #	Expiration Da...	Serial #

The iCAM inventory grid: lots, expiration dates and serial numbers side by side, with expired stock flagged automatically.

38 agencies served

16 states

7 statewide programs

20+ years serving emergency response

> *"iCAM has greatly improved our ability to manage and track emergency supplies and equipment, strengthening accountability, efficiency and Guam's overall emergency preparedness."*
>
> — Jonathan Lujan, Guam PHEP Program, Department of Public Health and Social Services

BUILT FOR

Public Health · Emergency Management · EMS · Fire · Hospitals · Law Enforcement · Response Teams

Including MRC, DMAT, USAR, HazMat, coroners and state medical response teams.

One system, every day and every emergency

The records you keep for daily operations become your situational picture when it matters most.

iCAM

Inventory & Tracking

- Supplies, equipment, consumables and assets
- Serial, lot and expiration tracking where it applies
- Many facilities, with nested storage locations
- Batch receiving and returns; maintenance and service dates

Resource Requests

- Authorized users and partner agencies submit requests online for review and approval
- Fulfill line by line, in stages, or drop-ship
- Pick tickets, shipping and receipt confirmation
- Accountable from request to delivery

Scanning & Labels

- Barcode labels for items, locations and pallets
- Scan to issue, move, check out, check in and log maintenance
- Bluetooth and wireless scanners supported
- Less typing, fewer errors in daily work

Planning & Readiness

- See how long supplies last at peak demand
- Plan reorders to reach target days of coverage
- Scheduled email reports: expirations, low stock, overdue returns, maintenance & asset tracking dates

Accountability

- Full history of issues, moves, transfers and returns
- Grant-funded purchases and remaining balances
- Equipment deployed to staff and partner agencies
- What you bought, where it went, what happened

Administration

- Web-based and multi-user
- Role-based permissions by facility and agency
- Import existing inventory and locations
- Reports with filters; export to PDF, Excel and CSV

Emergency Provisioning · daily use projected forward, with on-hand stock and days of supply

Item	Per Day	Projected Next 7 Days	Projected Next 14 Da...	Projected Next 21 D...	Projected Next 28 Days	On Hand	Days of Supply

Integration & connectivity. Connect iCAM to your other systems through its API: read inventory, location and transaction data, and create and track resource requests.

Own it. Don't rent it.

- **Perpetual license** that doesn't expire
- **No per-user fees**
- **One complete product**, no feature tiers
- **First year of support included**, then optional annual maintenance
- **Your data stays yours**
- **Add facility licenses** as you grow to statewide

Hosted your way

Your servers

On your own infrastructure, managed by your IT team

Sydion-hosted

Our U.S. data center in Phoenix, Arizona, as an annual service

Same iCAM either way.

Security & access

- Role-based permissions
- Single sign-on and two-factor sign-in
- Agency and facility data separation
- Browser-based; nothing to install on workstations
